

# ARCHER DENTAL

*Family Dentist in Chicago*

INVISALIGN

VS

BRACES

 Straightens teeth		
 Effectively treats a variety of cases (including crowding, spacing, crossbite, overbite & underbite)		
 Nearly invisible		 Requires visible brackets and wires
 Removable during treatment		 Can only be removed at the end of treatment
 Treatment doesn't involve metal that can irritate cheeks and gums		 The metal wires and brackets can often cause irritation
 Brush and floss normally		 Brushing and flossing requires more effort
 Freedom to eat the foods you normally would		 No sticky or very hard food to prevent them from being caught or damage the braces
 Cost	Same	Same
 Emergency appointments	Little to none	Brackets and wires may come off and require rebonding from time to time
 Orthodontic visits	Fewer visits, especially with Dental Monitoring (virtual appointments)	Visits every 4 – 6 weeks for adjustments
 Total treatment time	Often shorter by 0 – 5 months	Often longer than estimates
